

Revenue Intelligence

AI-Powered Revenue Assurance, Energy Accounting & Financial Intelligence for Modern Utilities

Utilities today face increasing pressure to maximize revenue realization while reducing technical and commercial losses, improving energy accounting, and maintaining financial transparency across increasingly complex utility operations.

Impresa Revenue Intelligence is an enterprise AI-powered platform that unifies operational, metering, financial, and customer data into a single intelligence layer. By transforming fragmented utility information into actionable business insights, it enables utilities to detect revenue leakage, optimize energy accounting, improve financial forecasting, and maximize revenue realization across the entire utility value chain.

Key Features

- Revenue Assurance Intelligence
- Consumption Anomaly Intelligence
- Energy Accounting Intelligence
- Commercial Loss Intelligence
- Financial Forecasting Intelligence
- Settlement Intelligence
- Consumer Demand Intelligence
- Revenue Optimization Intelligence
- Executive Revenue Intelligence
- AI-Powered Revenue Insights
- GenAI Assistant
- Revenue Operations Intelligence

Industry Challenges

Utilities face growing complexity in revenue management due to fragmented data, increasing losses, and limited visibility across energy, operational, and financial processes. Traditional approaches struggle to identify revenue leakage, consumption anomalies, and reconciliation gaps in real time. Utilities need AI-driven intelligence to improve transparency, optimize revenue realization, and enable faster financial decision-making.

 Revenue leakage from technical and commercial losses impacting revenue realisation	 Fragmented operational and financial data across disconnected enterprise systems	 Limited visibility into energy accounting, settlements, and loss reconciliation
 Manual financial processes causing delays in analysis and decision-making.	 Lack of early detection of consumption anomalies and commercial risks	 Increasing regulatory requirements demanding transparency and accurate reporting

AI-Powered Core Intelligence Capabilities

Transforming complex utility data into intelligent revenue insights through advanced AI, analytics, and automation. Enabling proactive revenue assurance, accurate energy accounting, and smarter financial decision-making. Delivering predictive intelligence to optimize revenue performance, reduce losses, and enhance operational efficiency.

Business Benefits

15-20%

Reduction in Technical & Commercial Losses

30%

Faster Revenue Investigations

20%

Improvement in Revenue Visibility

100%

End-to-End Revenue Lifecycle Visibility

- Maximize Revenue Realization
- Improve Energy Accounting Accuracy
- Reduce Technical & Commercial Losses
- Increase Financial Transparency
- Accelerate Revenue Recovery
- Enhance Executive Decision-Making

Predictive Analytics

Revenue leakage prediction, consumption anomaly forecasting, energy accounting validation, commercial loss forecasting, financial forecasting, settlement optimization, and revenue risk scoring.

Generative AI

Revenue Copilot, natural language analytics, executive business summaries, automated root cause analysis, intelligent investigation assistance, revenue recommendations, and AI-generated operational insights.

Supported Utility Use Cases

Revenue Assurance

Leverage AI-powered intelligence to detect abnormal consumption, identify revenue leakage, prioritize high-risk investigations, and improve revenue recovery across the utility network.

Energy Accounting

Provide complete visibility into energy delivered, energy accounted, financial reconciliation, and settlement processes to improve operational and financial accuracy.

Financial Intelligence

Transform operational and financial data into executive insights that improve forecasting, budgeting, performance measurement, and strategic decision-making

AI-Powered Revenue Operations

Empower revenue assurance and financial operations teams with AI-driven recommendations, conversational analytics, intelligent investigations, and automated decision support.

Why Utilities Choose Impresa

Compatible with leading utility enterprise systems including:

Purpose-built for utility revenue assurance and financial intelligence

Unified operational, metering, and financial intelligence platform

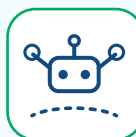

AI-powered anomaly detection and revenue optimization

Accelerated deployment with utility-specific accelerators

Open, scalable, enterprise-ready architecture

Designed for future autonomous revenue operations
